Gadgets: AI Speakers technology (Echo, Google Home

XiaoAi), Smart Home Devices

Operating Systems: Microsoft Windows, Apple IOS, Chrome OS, Android Years of coding Experience

I was an Exco member in the Automation and Robotics Club. I pioneered a new method of loaning and tracking the numerous items that the CCA maintains in its inventory. I represented the school in many events, the Drone Odyssey 2020 -Coding Challenge, received the 1st Individual Placing, DigiGirlz 2020 and ITE College East Robotics Challenge. Drones tend to have problems in high rise building areas, so we designed a simulation using a 3D maker to show drones have error when using GPS to move in high rise building areas, suggesting to use ILS707 instead of GPS. I participated in NEmation, was placed in the top 20.I have a strong interest in mathematics, participated in the Australian Mathematics competition, achieved a Certificate of Proficiency. I volunteered at the old folk home to teach the elderly people how to use their mobile phone, save their photos into the drive, use e-payments. I taught a group of elderly how they can watch their favourite shows and songs on YouTube using voice commands.

OMPETITION:

2018 NEmation! 13 Video Making

2019 Australia Mathematics
Mathematics Competition

2020 • ITE Robotics Challenge
Designing and Programming

2020 **Drone Odyssey**Prone application design & coding

2020 DigiGirlz 2020
Creating an Empathy application

AWARDS:

1st Individual Placing in Drone Odyssey Coding

1st Runner Up in AWS Hachthon!

Certificate of Proficiency in Australian Mathematics Competition

8 COMPLETED PROJECTS

Python

Power App / Automate

Presentation Skill

C ATTITUDE

Perseverance

Self-Driven
